REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of the claims in this case is the inclusion of the claimed limitation of where only one start record and only one stop record are sent to an accounting server for a plurality of short data burst transmissions which are included in all the independent claims and which is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

US Patent 6,405,251, inventor Bullard et al., which was commonly owned or subject to an obligation of assignment to the assignee of the instant application at the time the invention was made (see Applicant's arguments filed 9/2/04) discloses a method for aggregating data, but does not have claims that set forth one start record and only one stop record being sent to an accounting server for a plurality of short data burst transmissions.

US Patent 6,512,754, inventor Feder et al., discloses a method to optimize accounting records in a wireless/packet data network, but does not disclose the claimed

method which includes only one start record and only one stop record being sent to an accounting server for a plurality of short data burst transmissions as claimed.

3G Packet Data Accounting Requirements, author Lipford, discloses a method to optimize accounting records in a wireless/packet data network, but does not disclose the claimed method which includes only one start record and only one stop record being sent to an accounting server for a plurality of short data burst transmissions as claimed.
